**PORTAL: LIBRARIES AND THE ACADEMY BOARD OF EDITORS SELECTION  
COMMITTEE ANNOUNCES THE 2005 JOHNS HOPKINS UNIVERSITY PRESS  
AWARD FOR BEST ARTICLE**

Washington, DC - *The portal: Libraries and the Academy* Board of Editors Awards Committee announced that "A Survey of Business Trends at BioOne Publishing Partners and its Implications for BioOne" (October 2004, Volume 4, Number 4), authored by Todd A. Carpenter, Heather Joseph, and Mary Waltham, has been awarded the 2005 Johns Hopkins University Press award for the best article featured in *portal* in 2004.

Selection criteria for this award included: quality of research methodology, the extent to which the article places library issues in a broader academic or higher education context, the extent to which the article makes a significant contribution to the literature or the advancement of knowledge, timeliness and the overall quality of writing. After an independent review of articles nominated by board members, "A Survey of Business Trends at BioOne Publishing Partners and its Implications for BioOne" was selected as the inaugural recipient.

The winning article analyzed results from a SPARC-sponsored survey of BioOne publishers conducted by Mary Waltham in the fall of 2003. Data were collected from both profit and not-for-profit publishers on scholarly output in terms of pages and articles produced, revenues, expenditures, profit, loss, and circulation, and compared against industry-standard benchmarks. The end result was an assessment of business practices documenting the effect of recent trends on publishers' revenue streams and costs.

"We're honored to receive this recognition from Johns Hopkins University Press," said Heather Joseph, President of BioOne and co-author of the article. "BioOne is committed to advancing the partnership between libraries and the non-profit publishing community, and sharing information on our operations is integral to our mission."

The winning article is available in an open repository on the *Project MUSE* website at:-
